SERVICES

1

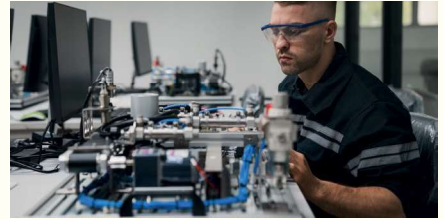

FEASIBILITY STUDY

We carry out feasibility studies on your use case to assess the adaptability of non-conventional imaging to your specific requirements.

2

INSTRUMENTAL DEVELOPMENT

Photonics Open Projects' technical team selects and designs the most appropriate spectral instrumentation to meet your individual requirements.

3

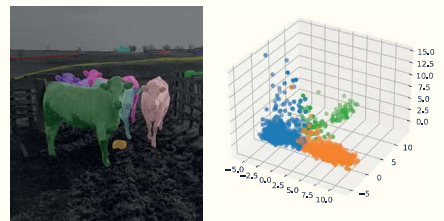

SENSORS DEPLOYMENT

We can help you implementing the technology to ensure successful deployment.

4

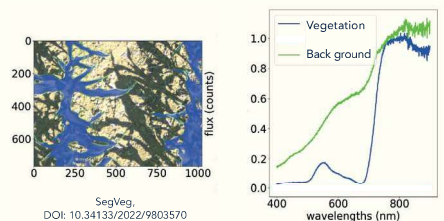

CREATION OF ACTIONABLE DATA

We can help you create a spectral data interpretation model adapted to your needs, with direct implementation within a sensor.

5

INTEGRATION OF PROPRIETARY ALGORITHMS

We offer the possibility to integrate it into our devices to meet your specific needs or to remunerate you for its further uses.
